

HARSHIT MALIK

✉ harshitmalik110@gmail.com 9675091285

PROFESSIONAL SUMMARY

B.Tech CSE (AI & ML) undergraduate with a strong foundation in Machine Learning, data analysis, and core computer science concepts. Actively solving DSA problems daily to strengthen problem-solving and algorithmic thinking. Hands-on experience in building real-world ML-driven projects through hackathons and academic initiatives, with proficiency in Python, C++, and SQL.

SKILLS

Technical Skills: C, C++, Python, SQL, Machine Learning , ,JAVA
HTML, **Libraries & Frame Works:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow. **Core Competencies:** DSA, OOPS, CN, DBMS, DAA, OS.
Tools & Platforms: Git & GitHub , Jupyter Notebook, Visual Studio Code, .
Soft Skills: Analytical Thinking, Team Collaboration, Communication, Time Management.

PROJECTS

- MITM (Man-in-the-Middle) Attack Detection & Prevention using IDS/IPS:** Jan 2026 - Present
- Designed a network security system to detect and mitigate Man-in-the-Middle attacks using Intrusion Detection Systems (IDS) and Intrusion Prevention Systems (IPS).
 - Monitored network traffic to identify suspicious patterns such as packet spoofing, ARP poisoning, and session hijacking.
 - Implemented real-time alerting and automated response mechanisms to block malicious traffic.
 - Improved network security and threat visibility through rule-based and anomaly-based detection techniques.
- Sign Language to Sentence Conversion System:** Jan 2025 - May 2025
- Developed a computer vision-based system to convert sign language gestures into meaningful text sentences.
 - Used deep learning models to recognize hand gestures and sequential movements from video input.
 - Performed data preprocessing, gesture classification, and sentence formation for improved accuracy.
 - Aimed to enhance communication accessibility for hearing- and speech-impaired individuals.
- Football Player Detection using YOLO:** June 2025 - July 2025
- Built a real-time football player detection system using the YOLO (You Only Look Once) object detection algorithm.
 - Trained and tested the model to accurately detect and localize players in match footage.
 - Applied image preprocessing, annotation, and model optimization for improved detection performance.
 - Demonstrated applications in sports analytics, player tracking, and performance analysis.

ACHIEVEMENTS

- In-house AI Bootcamp | Machine Learning & Power BI Trainee** June 2025 - July 2025
 - Completed a summer bootcamp at Sharda University on data structures and core programming.
 - Gained hands-on ML experience in data cleaning, preprocessing, visualization, and model evaluation.
 - Built multiple capstone and mini projects applying ML to real problems.
 - Developed Power BI dashboard skills and improved communication through MIP, GD, and soft-skills sessions.

CERTIFICATIONS

PYTHON Foundations — Sharda University — Sep

2024 PYTHON Fundamentals — Oracle Academy —

Machine Learning for Beginners — Skill Nation — Jul 2024

Machine Learning / Data Analytics Certification — Great Learning — Jul 2024

EDUCATION

Senior Secondary(XII)	KENDRIYA VIDHYALAYA	75.5%	April 2022 — March 2023
Secondary (X)	KENDRIYA VIDHYALAYA	80.5%	April 2020— March 2021
